Welcome to **Morter HealthCenter**

Often times, we simply need to step out of our normal daily routine in order to reconnect with what matters most and re-establish our ability to manifest health, joy, and abundance in our lives. Sometimes even when we *do* take the time, we still find ourselves bumping up against blockages that we may or may not be able to identify. Medical diagnosis, therapeutic efforts, counseling, and even spiritual inquiry are unsuccessful for seemingly no reason – *consciously*.

It is possible that the reasons for the blockages are not to be found at the conscious level but rather are stored *subconsciously* in the nerve and energy systems of the body. In our multiple day treatment programs, great care is taken to identify the source of interference in the individual's life be it physical, chemical, subconscious, emotional, or integrative in nature. What we typically find is that the blockages are not necessarily what one might think they are. Pain, whether it is physical, mental, or emotional, is merely a signal that the system isn't running as it was built to run.

Tests and evaluations are administered to determine the nature of the issue(s) followed by Bio-Energetic treatments and in-depth consultations about individualized plan of care. Bio-Energetic Synchronization Technique (B.E.S.T.) is an energy-balancing procedure that removes the interference and/or blockages that are demanding the attention of the healing power of the body, thereby causing an imbalance in the autonomic nervous system, ultimately leading to disease.

Each day, multiple B.E.S.T. treatments are given, and the discovery process of how to interpret the effects of one's past experiences evolves in a more empowering way. As interference is removed, the body and the mind begin to return to their natural states of healing

and manifesting. Body chemistry (pH) testing is performed to determine the current healing capacity of the body, and recommendations are given for action steps needed.

A test kit for follow-up is sent home with each participant in the program. A nutritional supplementation evaluation is also performed. Static EMG testing is done to determine the electrical output of the central nervous system, and thermography tests are ran to determine circulation efficiency. X-rays may be taken if appropriate and indicated.

Multiple conversations, teachings, and recommendations coincide with the Personal B.E.S.T. Master Plan created during a specifically tailored treatment regime.

At Morter Health Center, the goal is to send individual's home with a clear, concise picture and plan of action to restore more perfect health and to ignite creative capacity both consciously and subconsciously for the life experience that was intended for them.

focused care package prices:

Consultation and Examination	\$295.00	2nd Day:	
Take Home pH test Kit	\$45.00	3 Extended BEST Treatments	\$336.00
2 extended BEST Treatments	\$224.00	1 Debriefing Consultation	\$112.00
1 Debriefing Consultation	\$112.00		
<hr/>			
1st Day:	\$676.00	Subsequent Days:	\$448.00

- Fees for additional days there after, would be reflected in the 2nd day amounts given.
- If multiple days are scheduled (more than two), a debriefing consultation at the end of each day may not be necessary.
- It has been clinically tracked that three consecutive days of treatment are the most effective, but shorter programs respond well, taking a longer response time for some cases.
